

## Connecting the Roland Recorder to your MAC

- 1) Connect the device to your computer with the included USB cable  
(**note: the device must be powered on**)

- 2) Navigate to your device on your computer
  - a) The device icon will appear on your desktop-- double click it to open

- 3) Find your recording and drag it to the folder you want on your computer

From here, you will be able to open your recording file in programs, such as [Audacity](#), to edit.
