**Turning On Your Webcam in Adobe Connect**

By default, your webcam is off in Adobe Connect. In order to use it in your meeting, you have to manually turn it on.

1. Go to your Adobe Connect meeting

2. In the toolbar on the top, click the webcam icon

3. You may get to a screen asking if you want to authorize Adobe to access your webcam, click *Allow*

4. Depending on your web browser, you may get a second notification on the top asking if you want to allow Adobe to access your webcam. This is a security measure to make sure you haven’t been hacked. Click *Allow.*
5. In order for other participants to see what is on your webcam, hover over to where your webcam is being displayed and click *Start Sharing*

6. In order to stop sharing your webcam with everyone, click *Stop Sharing My Webcam*
